

AMENDMENTS TO THE ABSTRACT

The novel peptides Ac-D-2Nal-D-4ClPhe-D-3Pal-OH and Boc-D-2Nal-D-4ClPhe-D-3Pal-OH are intermediates useful in the synthesis of LHRH analogs by coupling with suitable heptapeptides, in particular with the heptapeptides P¹-Ser(P²)-NMeTry(P³)-D-Lys(Nic)-Leu-Lys(iPr,P⁴)-Pro-D-AlaNH₂ and P¹-Ser(P²)-NMeTry(P³)-D-Asn-Leu-Lys(iPr,P⁴)-Pro-D-AlaNH₂.
